

## 化 学 品 安 全 技 术 说 明 书

填表时间 2019-12-30

打印时间 2026-02-19

### MSDS标题

KIWI SPORT SHAMPOO\*\*\*\*\*OBSOLETE\*\*\*\*\* MSDS报告

### 产品标题

二丙二醇单甲醚

### CAS号

34590-94-8

### 化学品及企业标识

## PRODUCT NAME

KIWI SPORT SHAMPOO\*\*\*\*\*OBSOLETE\*\*\*\*\*

## NFPA

Flammability	0
Toxicity	0
Body Contact	3
Reactivity	0
Chronic	0

SCALE: Min/Nil=0 Low=1 Moderate=2 High=3 Extreme=4

## PRODUCT USE

Hair shampoo.

## **SYNONYMS**

"hair shampoo"

## **CANADIAN WHMIS SYMBOLS**

## **EMERGENCY OVERVIEW**

### **RISK**

Risk of serious damage to eyes.

## **POTENTIAL HEALTH EFFECTS**

### **ACUTE HEALTH EFFECTS**

#### **SWALLOWED**

Although ingestion is not thought to produce harmful effects, the material may still be damaging to the health of the individual following ingestion, especially where pre-existing organ (e.g. liver, kidney) damage is evident. Present definitions of harmful or toxic substances are generally based on doses producing mortality (death) rather than those producing morbidity (disease, ill-health). Gastrointestinal tract discomfort may produce nausea and vomiting. In an occupational setting however, ingestion of insignificant quantities is not thought to be cause for concern.

#### **EYE**

If applied to the eyes, this material causes severe eye damage. The liquid may produce eye discomfort causing smarting, pain and redness.

#### **SKIN**

The material is not thought to produce adverse health effects or skin irritation following contact (as classified using animal models). Nevertheless, good hygiene practice requires that exposure be kept to a minimum and that suitable gloves be used in an occupational setting. The liquid is not harmful to the skin when used as directed.

#### **INHALED**

The material is not thought to produce adverse health effects or irritation of the respiratory tract (as classified using animal models). Nevertheless, good hygiene practice requires that exposure be kept to a minimum and that suitable control measures be used in an occupational setting. Not normally a hazard due to non-volatile nature of product.

## CHRONIC HEALTH EFFECTS

There is some evidence that inhaling this product is more likely to cause a sensitization reaction in some persons compared to the general population.

Principal route of exposure is usually by skin contact. The undiluted liquid may remove oils from the skin on prolonged or repeated contact.
