MSDS标题

KODAK DEKTOL DEVELOPER (SINGLE POWDER) MSDS报告

产品标题

碳酸钠(一水);碳酸钠,一水;一水合碳酸钠;一水碳酸钠;碳氧;碳酸水;苏打粉;碳酸水石

CAS号

5968-11-6

化学品及企业标识

PRODUCT NAME

KODAK DEKTOL DEVELOPER (SINGLE POWDER)

NFPA

Flammability	0
Toxicity	2
Body Contact	3
Reactivity	0
Chronic	2

SCALE: Min/Nil=0 Low=1 Moderate=2 High=3 Extreme=4

PRODUCT USE

Developer normally used as a prepared solution.

SYNONYMS

"Dektol Developer", Developer

CANADIAN WHMIS SYMBOLS

EMERGENCY OVERVIEW

RISK

Risk of serious damage to eyes.

May cause SENSITIZATION by skin contact.

Limited evidence of a carcinogenic effect.

Possible risk of irreversible effects.

Harmful: danger of serious damage to health by prolonged exposure if swallowed.

Irritating to respiratory system and skin.

Toxic to aquatic organisms, may cause long- term adverse effects in the aquatic environment.

POTENTIAL HEALTH EFFECTS

ACUTE HEALTH EFFECTS

SWALLOWED

Although ingestion is not thought to produce harmful effects, the material may still be damaging to the health of the individual following ingestion, especially where pre-existing organ (e.g. liver, kidney) damage is evident. Present definitions of harmful or toxic substances are generally based on doses producing mortality (death) rather than those producing morbidity (disease, ill-health). Gastrointestinal tract discomfort may produce nausea and vomiting. In an occupational setting however, ingestion of insignificant quantities is not thought to be cause for concern. Considered an unlikely route of entry in commercial/industrial environments. Ingestion may result in nausea, abdominal irritation, pain and vomiting.

EYE

If applied to the eyes, this material causes severe eye damage.

SKIN

This material can cause inflammation of the skin on contact in some persons. Skin contact is not thought to have harmful health effects, however the material may still produce health damage following entry through wounds, lesions or abrasions. Sensitization may result in allergic dermatitis responses including rash, itching, hives or swelling of extremities.

INHALED

Inhalation may produce health damage*. If inhaled, this material can irritate the throat and lungs of some persons.

CHRONIC HEALTH EFFECTS

There has been concern that this material can cause cancer or mutations, but there is not enough data to make an assessment. Skin contact with the material is more likely to cause a sensitization reaction in some persons compared to the general population.

Principal routes of exposure are usually by inhalation of generated dust and skin contact. Sensitization reactions may appear suddenly after repeated symptom free exposures.
