**MSDS标题**

WOOLWORTHS SELECT EXTRA VIRGIN OLIVE OIL SP MSDS报告

**产品标题**

洋橄榄油;油橄榄;果油

**CAS号**

8001-25-0

**化学品及企业标识**

**PRODUCT NAME**

WOOLWORTHS SELECT EXTRA VIRGIN OLIVE OIL SPRAY BY AARON

**NFPA**

Flammability	1
Toxicity	0
Body Contact	2
Reactivity	1
Chronic	0

SCALE: Min/Nil=0 Low=1 Moderate=2 High=3 Extreme=4

**PRODUCT USE**

Application is by spray atomization from a hand held aerosol pack. Cooking aid.

## **SYNONYMS**

"Woolworths Home Brand"

## **CANADIAN WHMIS SYMBOLS**

## **EMERGENCY OVERVIEW**

### **RISK**

Extremely flammable.

Risk of explosion if heated under confinement.

## **POTENTIAL HEALTH EFFECTS**

### **ACUTE HEALTH EFFECTS**

#### **SWALLOWED**

Although ingestion is not thought to produce harmful effects, the material may still be damaging to the health of the individual following ingestion, especially where pre-existing organ (e.g. liver, kidney) damage is evident. Present definitions of harmful or toxic substances are generally based on doses producing mortality (death) rather than those producing morbidity (disease, ill-health). Gastrointestinal tract discomfort may produce nausea and vomiting. In an occupational setting however, ingestion of insignificant quantities is not thought to be cause for concern. Not considered an irritant through normal use. Use in food, and as food additive indicates high degree of tolerance.

#### **EYE**

Not considered an irritant through normal use. Although the material is not thought to be an irritant, direct contact with the eye may produce transient discomfort characterized by tearing or conjunctival redness (as with windburn). Not considered to be a risk because of the extreme volatility of the gas.

#### **SKIN**

The material is not thought to produce adverse health effects or skin irritation following contact (as classified using animal models). Nevertheless, good hygiene practice requires that exposure be kept to a minimum and that suitable gloves be used in an occupational setting. Not considered an irritant through normal use. Skin contact is not thought to have harmful health effects, however the material may still produce health damage following entry through wounds, lesions or abrasions. Spray mist may produce discomfort. Entry into the blood-stream, through, for example, cuts,

abrasions or lesions, may produce systemic injury with harmful effects. Examine the skin prior to the use of the material and ensure that any external damage is suitably protected.

## **INHALED**

There is some evidence to suggest that this material, if inhaled, can irritate the throat and lungs of some persons. Although inhalation is not thought to produce harmful effects, the material may still produce health damage, especially where pre-existing organ (e.g. liver, kidney) damage is evident. Present definitions of harmful or toxic substances are generally confined to doses producing mortality (death) rather than those producing morbidity (disease, ill-health). Not normally a hazard due to physical form of product. Inhalation of vapor is more likely at higher than normal temperatures. Inhalation of high concentrations of gas/vapor causes lung irritation with coughing and nausea, central nervous depression with headache and dizziness, slowing of reflexes, fatigue and inco-ordination. **WARNING:** Intentional misuse by concentrating/inhaling contents may be lethal.

## **CHRONIC HEALTH EFFECTS**

**WARNING:** Aerosol containers may present pressure related hazards. Principal route of exposure is usually by skin contact.
