MSDS标题

U.V. TRIPLEGARD 30+ 4 HOUR WATER SPORTS 110ML MSDS报告

产品标题

十六酸-1-甲基乙基酯;十六酸异丙酯;十六烷酸异丙酯

CAS号

142-91-6

化学品及企业标识

PRODUCT NAME

U.V. TRIPLEGARD 30+ 4 HOUR WATER SPORTS 110ML

NFPA

Flammability	0
Toxicity	1
Body Contact	1
Reactivity	0
Chronic	2
SCALE: Min/Nil=0 Low=1 Moderate=2 High=3 Extreme=4	

PRODUCT USE

Heavy duty, 4 hour water resistant SPF 30+ sunscreen.

SYNONYMS

"Boots sunscreen lotion broad spectrum sun lotion UV screen cream"

CANADIAN WHMIS SYMBOLS

EMERGENCY OVERVIEW

RISK

Possible risk of impaired fertility.

Toxic to aquatic organisms, may cause long- term adverse effects in the aquatic environment.

POTENTIAL HEALTH EFFECTS

ACUTE HEALTH EFFECTS

SWALLOWED

Although ingestion is not thought to produce harmful effects, the material may still be damaging to the health of the individual following ingestion, especially where pre- existing organ (e.g. liver, kidney) damage is evident. Present definitions of harmful or toxic substances are generally based on doses producing mortality (death) rather than those producing morbidity (disease, ill-health). Gastrointestinal tract discomfort may produce nausea and vomiting. In an occupational setting however, ingestion of insignificant quantities is not thought to be cause for concern.

EYE

Although the material is not thought to be an irritant, direct contact with the eye may produce transient discomfort characterized by tearing or conjunctival redness (as with windburn).

SKIN

The material is not thought to produce adverse health effects or skin irritation following contact (as classified using animal models). Nevertheless, good hygiene practice requires that exposure be kept to a minimum and that suitable gloves be used in an occupational setting.

INHALED

The material is not thought to produce adverse health effects or irritation of the respiratory tract (as classified using animal models). Nevertheless, good hygiene practice requires that exposure be kept to a minimum and that suitable control measures be used in an occupational setting. Not normally a

hazard due to non-volatile nature of product.

CHRONIC HEALTH EFFECTS

Principal routes of exposure are usually by skin contact and eye contact. The product is considered to be practically non-harmful by all exposure routes when used in accordance with directions.
