

## 化 学 品 安 全 技 术 说 明 书

填表时间 2020-01-18

打印时间 2025-12-27

### MSDS标题

YORKSHIRE FLEXOBRITE BLUE 679\*\*\*OBSOLETE\*\*\* MSDS报告

### 产品标题

颜料蓝15

### CAS号

147-14-8

### 化学品及企业标识

## PRODUCT NAME

YORKSHIRE FLEXOBRITE BLUE 679\*\*\*OBSOLETE\*\*\*

## NFPA

Flammability	0
Toxicity	1
Body Contact	2
Reactivity	0
Chronic	0
SCALE: Min/Nil=0 Low=1 Moderate=2 High=3 Extreme=4	

## PRODUCT USE

Dye for inks, paints and coatings.

## **SYNONYMS**

"pigment dispersion dye Flexo-bright (misspelling)"

## **CANADIAN WHMIS SYMBOLS**

## **EMERGENCY OVERVIEW**

## **RISK**

## **POTENTIAL HEALTH EFFECTS**

## **ACUTE HEALTH EFFECTS**

## **SWALLOWED**

Although ingestion is not thought to produce harmful effects, the material may still be damaging to the health of the individual following ingestion, especially where pre-existing organ (e.g. liver, kidney) damage is evident. Present definitions of harmful or toxic substances are generally based on doses producing mortality (death) rather than those producing morbidity (disease, ill-health). Gastrointestinal tract discomfort may produce nausea and vomiting. In an occupational setting however, ingestion of insignificant quantities is not thought to be cause for concern. diarrhea. Considered an unlikely route of entry in commercial/industrial environments.

## **EYE**

There is some evidence to suggest that this material can cause eye irritation and damage in some persons. The material may be irritating to the eye, with prolonged contact causing inflammation. Repeated or prolonged exposure to irritants may produce conjunctivitis.

## **SKIN**

The material is not thought to produce adverse health effects or skin irritation following contact (as classified using animal models). Nevertheless, good hygiene practice requires that exposure be kept to a minimum and that suitable gloves be used in an occupational setting. Excessive use or prolonged contact may lead to defatting, drying and irritation of sensitive skin. The material may cause skin irritation after prolonged or repeated exposure and may produce on contact skin redness, swelling, the production of vesicles, scaling and thickening of the skin.

## **INHALED**

Inhalation may produce health damage\*. The material is not thought to produce respiratory irritation (as classified using animal models).

Nevertheless inhalation of the material, especially for prolonged periods, may produce respiratory discomfort and occasionally, distress. Not normally a hazard due to non-volatile nature of product. Inhalation hazard is increased at higher temperatures.

## **CHRONIC HEALTH EFFECTS**

Principal routes of exposure are usually by skin contact. Excessive repeated ingestions may cause central nervous system depression and in susceptible individuals may cause hypoglycemia (a deficiency of glucose in the bloodstream causing muscular weakness and incoordination, mental confusion and sweating), lactic acidosis (abnormally high acidity of body fluids and tissues) and seizures. As with any chemical product, contact with unprotected bare skin; inhalation of vapor, mist or dust in work place atmosphere; or ingestion in any form, should be avoided by observing good occupational work practice.
