### MSDS标题

UNIVAR TERMIDOR SC TERMITICIDE/INSECTICIDE MSDS报告

### 产品标题

氟虫氰;5-氨基-1-(2,6-二氯-4-三氟甲基苯基)-4-三氟甲基亚磺酰基吡唑-3-腈;非泼罗尼

### CAS号

120068-37-3

### 化学品及企业标识

## PRODUCT NAME

UNIVAR TERMIDOR SC TERMITICIDE/INSECTICIDE

## NFPA

Flammability	0
Toxicity	4
Body Contact	2
Reactivity	0
Chronic	2
SCALE: Min/Nil=0 Low=1 Moderate=2 High=3 Extreme=4	

## PRODUCT USE

Termiticide and insecticide.

## **SYNONYMS**

termiteicide, insecticide

## **CANADIAN WHMIS SYMBOLS**

## **EMERGENCY OVERVIEW**

### **RISK**

Harmful in contact with skin.

Danger of cumulative effects.

Harmful: danger of serious damage to health by prolonged exposure if swallowed.

Very toxic by inhalation and if swallowed.

Very toxic to aquatic organisms, may cause long-term adverse effects in the aquatic environment.

### **POTENTIAL HEALTH EFFECTS**

#### **ACUTE HEALTH EFFECTS**

##### **SWALLOWED**

Severely toxic effects may result from the accidental ingestion of the material; animal experiments indicate that ingestion of less than 5 gram may be fatal or may produce serious damage to the health of the individual. Accidental ingestion of the material may be harmful; animal experiments indicate that ingestion of less than 150 gram may be fatal or may produce serious damage to the health of the individual.

##### **EYE**

Although the liquid is not thought to be an irritant, direct contact with the eye may produce transient discomfort characterized by tearing or conjunctival redness (as with windburn).

##### **SKIN**

Skin contact with the material may be harmful; systemic effects may result following absorption. Absorption by skin may readily exceed vapor inhalation exposure. Symptoms for skin absorption are the same as for inhalation. Entry into the blood-stream, through, for example, cuts, abrasions or lesions, may produce systemic injury with harmful effects. Examine the skin prior to the use of the material and ensure that any external damage is suitably protected.

## **INHALED**

Inhalation of vapors or aerosols (mists, fumes), generated by the material during the course of normal handling, may be harmful.

## **CHRONIC HEALTH EFFECTS**

Repeated or long-term occupational exposure is likely to produce cumulative health effects involving organs or biochemical systems.
