**MSDS标题**

O-BROMOPHENETOLE MSDS报告

**产品标题**

2-溴苯基乙醚;邻溴苯乙醚

**CAS号**

583-19-7

**化学品及企业标识**

**PRODUCT NAME**

O-BROMOPHENETOLE

**NFPA**

Flammability	1
Toxicity	2
Body Contact	0
Reactivity	2
Chronic	2

SCALE: Min/Nil=0 Low=1 Moderate=2 High=3 Extreme=4

**PRODUCT USE**

Regeant

## **SYNONYMS**

C8-H9-Br-O, 2-ethoxy-bromobenzene, 2-ethoxy-bromobenzene, "o-ethoxybenzoyl bromo-", "o-ethoxybenzoyl bromo-", 2-bromophenetole, 2-bromophenetole, o-ethoxybromobenzene, o-ethoxybromobenzene, "phenetole, o-bromo-", "phenetole, o-bromo-", "2-bromophenyl ethyl ether", "2-bromophenyl ethyl ether"

## **CANADIAN WHMIS SYMBOLS**

## **EMERGENCY OVERVIEW**

### **RISK**

May form explosive peroxides.  
Harmful if swallowed.

## **POTENTIAL HEALTH EFFECTS**

### **ACUTE HEALTH EFFECTS**

#### **SWALLOWED**

Accidental ingestion of the material may be harmful; animal experiments indicate that ingestion of less than 150 gram may be fatal or may produce serious damage to the health of the individual.

#### **EYE**

Although the liquid is not thought to be an irritant, direct contact with the eye may produce transient discomfort characterized by tearing or conjunctival redness (as with windburn).

#### **SKIN**

Skin contact is not thought to produce harmful health effects (as classified using animal models). Systemic harm, however, has been identified following exposure of animals by at least one other route and the material may still produce health damage following entry through wounds, lesions or abrasions. Good hygiene practice requires that exposure be kept to a minimum and that suitable gloves be used in an occupational setting. Entry into the blood-stream, through, for example, cuts, abrasions or lesions, may produce systemic injury with harmful effects. Examine the skin prior to the use of the material and ensure that any external damage is suitably protected.

#### **INHALED**

The material is not thought to produce either adverse health effects or irritation of the respiratory tract following inhalation (as classified using

animal models). Nevertheless, adverse effects have been produced following exposure of animals by at least one other route and good hygiene practice requires that exposure be kept to a minimum and that suitable control measures be used in an occupational setting.

## **CHRONIC HEALTH EFFECTS**

There is limited evidence that, skin contact with this product is more likely to cause a sensitization reaction in some persons compared to the general population.
