

## 化 学 品 安 全 技 术 说 明 书

填表时间 2019-12-31

打印时间 2026-01-26

### MSDS标题

W.S. FLAVORS ART. IRISH CREME FLAVOR MSDS报告

### 产品标题

初油酸乙酯; 丁基酞酰甘醇酸丁酯

### CAS号

105-37-3

### 化学品及企业标识

## PRODUCT NAME

W.S. FLAVORS ART. IRISH CREME FLAVOR

## NFPA

Flammability	1
Toxicity	0
Body Contact	2
Reactivity	1
Chronic	0

SCALE: Min/Nil=0 Low=1 Moderate=2 High=3 Extreme=4

## PRODUCT USE

Flavouring compound.

# **SYNONYMS**

?

## **CANADIAN WHMIS SYMBOLS**

### **EMERGENCY OVERVIEW**

#### **RISK**

In use, may form flammable/ explosive vapor- air mixture.

HARMFUL - May cause lung damage if swallowed.

Irritating to eyes and skin.

#### **POTENTIAL HEALTH EFFECTS**

##### **ACUTE HEALTH EFFECTS**

##### **SWALLOWED**

Although ingestion is not thought to produce harmful effects, the material may still be damaging to the health of the individual following ingestion, especially where pre-existing organ (e.g. liver, kidney) damage is evident. Present definitions of harmful or toxic substances are generally based on doses producing mortality (death) rather than those producing morbidity (disease, ill-health). Gastrointestinal tract discomfort may produce nausea and vomiting. In an occupational setting however, ingestion of insignificant quantities is not thought to be cause for concern. Use in food, and as food additive indicates high degree of tolerance.

##### **EYE**

This material can cause eye irritation and damage in some persons. The material may produce severe irritation to the eye causing pronounced inflammation. Repeated or prolonged exposure to irritants may produce conjunctivitis. Solutions of low-molecular weight organic acids cause pain and injury to the eyes.

##### **SKIN**

This material can cause inflammation of the skin on contact in some persons. Skin contact is not thought to have harmful health effects, however the material may still produce health damage following entry through wounds, lesions or abrasions. The material may accentuate any pre-existing dermatitis condition.

## **INHALED**

Not normally a hazard due to non-volatile nature of product. The material is not thought to produce adverse health effects or irritation of the respiratory tract (as classified using animal models). Nevertheless, good hygiene practice requires that exposure be kept to a minimum and that suitable control measures be used in an occupational setting.

## **CHRONIC HEALTH EFFECTS**

Long-term exposure to the product is not thought to produce chronic effects adverse to the health (as classified using animal models); nevertheless exposure by all routes should be minimized as a matter of course.
