MSDS标题

P-BROMOPHENETOLE MSDS报告

产品标题

对溴苯乙醚;4-溴苯甲酮;4-溴苯基乙醚

CAS号

588-96-5

化学品及企业标识

PRODUCT NAME

P-BROMOPHENETOLE

NFPA

Flammability	1
Toxicity	2
Body Contact	0
Reactivity	2
Chronic	2
SCALE: Min/Nil=0 Low=1 Moderate=2 High=3 Extreme=4	

PRODUCT USE

Regeant

SYNONYMS

C8-H9-Br-O, 1-ethoxy-bromobenzene, 1-ethoxy-bromobenzene, "p-ethoxybenzoyl bromo-", "p-ethoxybenzoyl bromo-", 4-bromophenetole, 4-bromophenetole, p-ethoxybromobenzene, p-ethoxybromobenzene, "phenetole, p-bromo-", "phenetole, p-bromo-", "4-bromophenyl ethyl ether", "4-bromophenyl ethyl ether"

CANADIAN WHMIS SYMBOLS

EMERGENCY OVERVIEW

RISK

May form explosive peroxides.

Harmful if swallowed.

May cause SENSITIZATION by skin contact.

POTENTIAL HEALTH EFFECTS

ACUTE HEALTH EFFECTS

SWALLOWED

Accidental ingestion of the material may be harmful; animal experiments indicate that ingestion of less than 150 gram may be fatal or may produce serious damage to the health of the individual.

EYE

Although the liquid is not thought to be an irritant, direct contact with the eye may produce transient discomfort characterized by tearing or conjunctival redness (as with windburn).

SKIN

Skin contact is not thought to produce harmful health effects (as classified using animal models). Systemic harm, however, has been identified following exposure of animals by at least one other route and the material may still produce health damage following entry through wounds, lesions or abrasions. Good hygiene practice requires that exposure be kept to a minimum and that suitable gloves be used in an occupational setting. Entry into the blood-stream, through, for example, cuts, abrasions or lesions, may produce systemic injury with harmful effects. Examine the skin prior to the use of the material and ensure that any external damage is suitably protected.

INHALED

The material is not thought to produce either adverse health effects or

irritation of the respiratory tract following inhalation (as classified using animal models). Nevertheless, adverse effects have been produced following exposure of animals by at least one other route and good hygiene practice requires that exposure be kept to a minimum and that suitable control measures be used in an occupational setting.

CHRONIC HEALTH EFFECTS

Skin contact with the material is more likely to cause a sensitization reaction in some persons compared to the general population.
